

ENVELLA AIR FLUIDIZED THERAPY BED

ELEVATING THE STANDARD OF CARE

Patients with complex wounds need elevated care. We developed the **Envella** Air Fluidized Therapy (AFT) Bed — our most advanced wound care surface to date — to help them heal more quickly and comfortably.

Hillrom is a part of Baxter

Baxter

Better Healing Starts with More Comfortable Patients

For Stage 3-4 Wounds

Prevent and treat stage 3-4 wounds with a superior wound healing environment.¹

For Flaps and Grafts

Protect against post-op surgical site complications to help patients with flaps and grafts heal faster.²

For Burns and Pain

Comfort patients with the sensation of floating in water with air flowing through millions of tiny beads.^{1,3}

Elevated Healing Differentiated Value

WHAT SETS THE ENVELLA AFT BED APART?

Building upon Hillrom's strong history in air fluidized therapy, the **Envella** bed offers many key improvements over older, metal tub designs — taking comfort, safety and ease of use to new levels.

ELEVATE COMFORT

- Adjustable comfort zones provide weight-based pressure redistribution at all head elevations with lumbar support section
- Auto-leveling bead bath and reinforced side bolsters maintain immersion and keep patients from bottoming out
- Patient pendant offers powered adjustment of head elevation and air cushion pressure
- Comfortable and dignified hospital bed design helps put patients at ease

ELEVATE SAFETY

- Bed exit alarm (with alert silence) helps protect patients at risk of falls
- Side/surface transfer deflates the head-of-bed and soft side bolsters to help you transfer patients in and out of bed
- Adjustable height for caregivers
- Head-of-bed angle indicator and alert help you monitor pulmonary complications
- CPR quick release handle gives you the access you need when you need it
- Internal diagnostics continuously monitor air flow and pressure to ensure optimum pressure redistribution
- Proven, multi-step decontamination processes are applied between every patient to help prevent cross contamination

ELEVATE EASE OF USE

- Integrated scale lets you weigh the patient any time without disrupting the wound site
- Simple touchscreen controls are consistent with other Hillrom beds
- Central brake/steer and alert make it easy to maneuver
- Removable, self-standing siderails and cord wrap are easy to use
- Instructions for use are built into the control screen to guide you through operation
- Soft, cushioned sides help prevent painful contact points for patients
- Optional integrated patient trapeze helps patients sit up safely and comfortably
