---

**Summary:** The below summarizes the changes between the previous installer release (WAST v1.9.0.0) and the current release (WAST v1.10.0). This includes changes made to the Core and Plugins, and all new device Plugins.

Items addressed are listed below:

1. Removed the Axeda Agent from the Installer package as this is no longer supported. When installing one must install the Service Tool then install the PartnerConnect agent
2. Updated the Calibration Certificate Template to address the Australia Service Center new address.
3. Removed Windows 7 support as this is considered end of support from Microsoft.
4. Updated application with security changes to minimize security risk.
